SEMESTER : BSIT 5TH (MORNING)

PROJECT DOCUMENTATION

1. Executive Summary

The **National Crime Bureau (NCB) Portal** is a sophisticated, dual-layer web application designed to bridge the gap between law enforcement operations and public safety awareness. Unlike traditional record-keeping systems, the NCB Portal features two distinct interfaces:

1. **Public Intelligence Dashboard (`index.php`)**: A transparency-focused portal for citizens to view real-time crime statistics, "Most Wanted" lists, and official news updates.
2. **Secure Internal Network (`login.php`)**: An encrypted backend for Officers, Newscasters, and Commanders to manage case files, publish news, and track personnel.

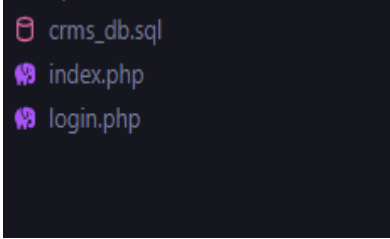

The system introduces advanced features such as **Biometric Data Fields**, **Math-Challenge Security**, **Audit Logging**, and a **News Desk** module, ensuring a modern approach to digital policing.

2. System Architecture

The system operates on a **Role-Based Access Control (RBAC)** architecture with strict separation between public and private data.

2.1 Public Front-End (`index.php`)

- **Purpose**: Information dissemination and community engagement.
- **Key Components**:
 - **Live Analytics**: Visualizes data using **Chart.js** to show crime distribution (Wanted vs. Solved).
 - **News Ticker**: Displays breaking news and alerts fetched from the `news_feed` table.
 - **Crime Mapping**: Integration of **Leaflet.js** for geospatial visualization of crime hotspots.
 - **Smart Image Loading**: Uses `DiceBear API` to generate avatars for records missing mugshots, ensuring a consistent UI.

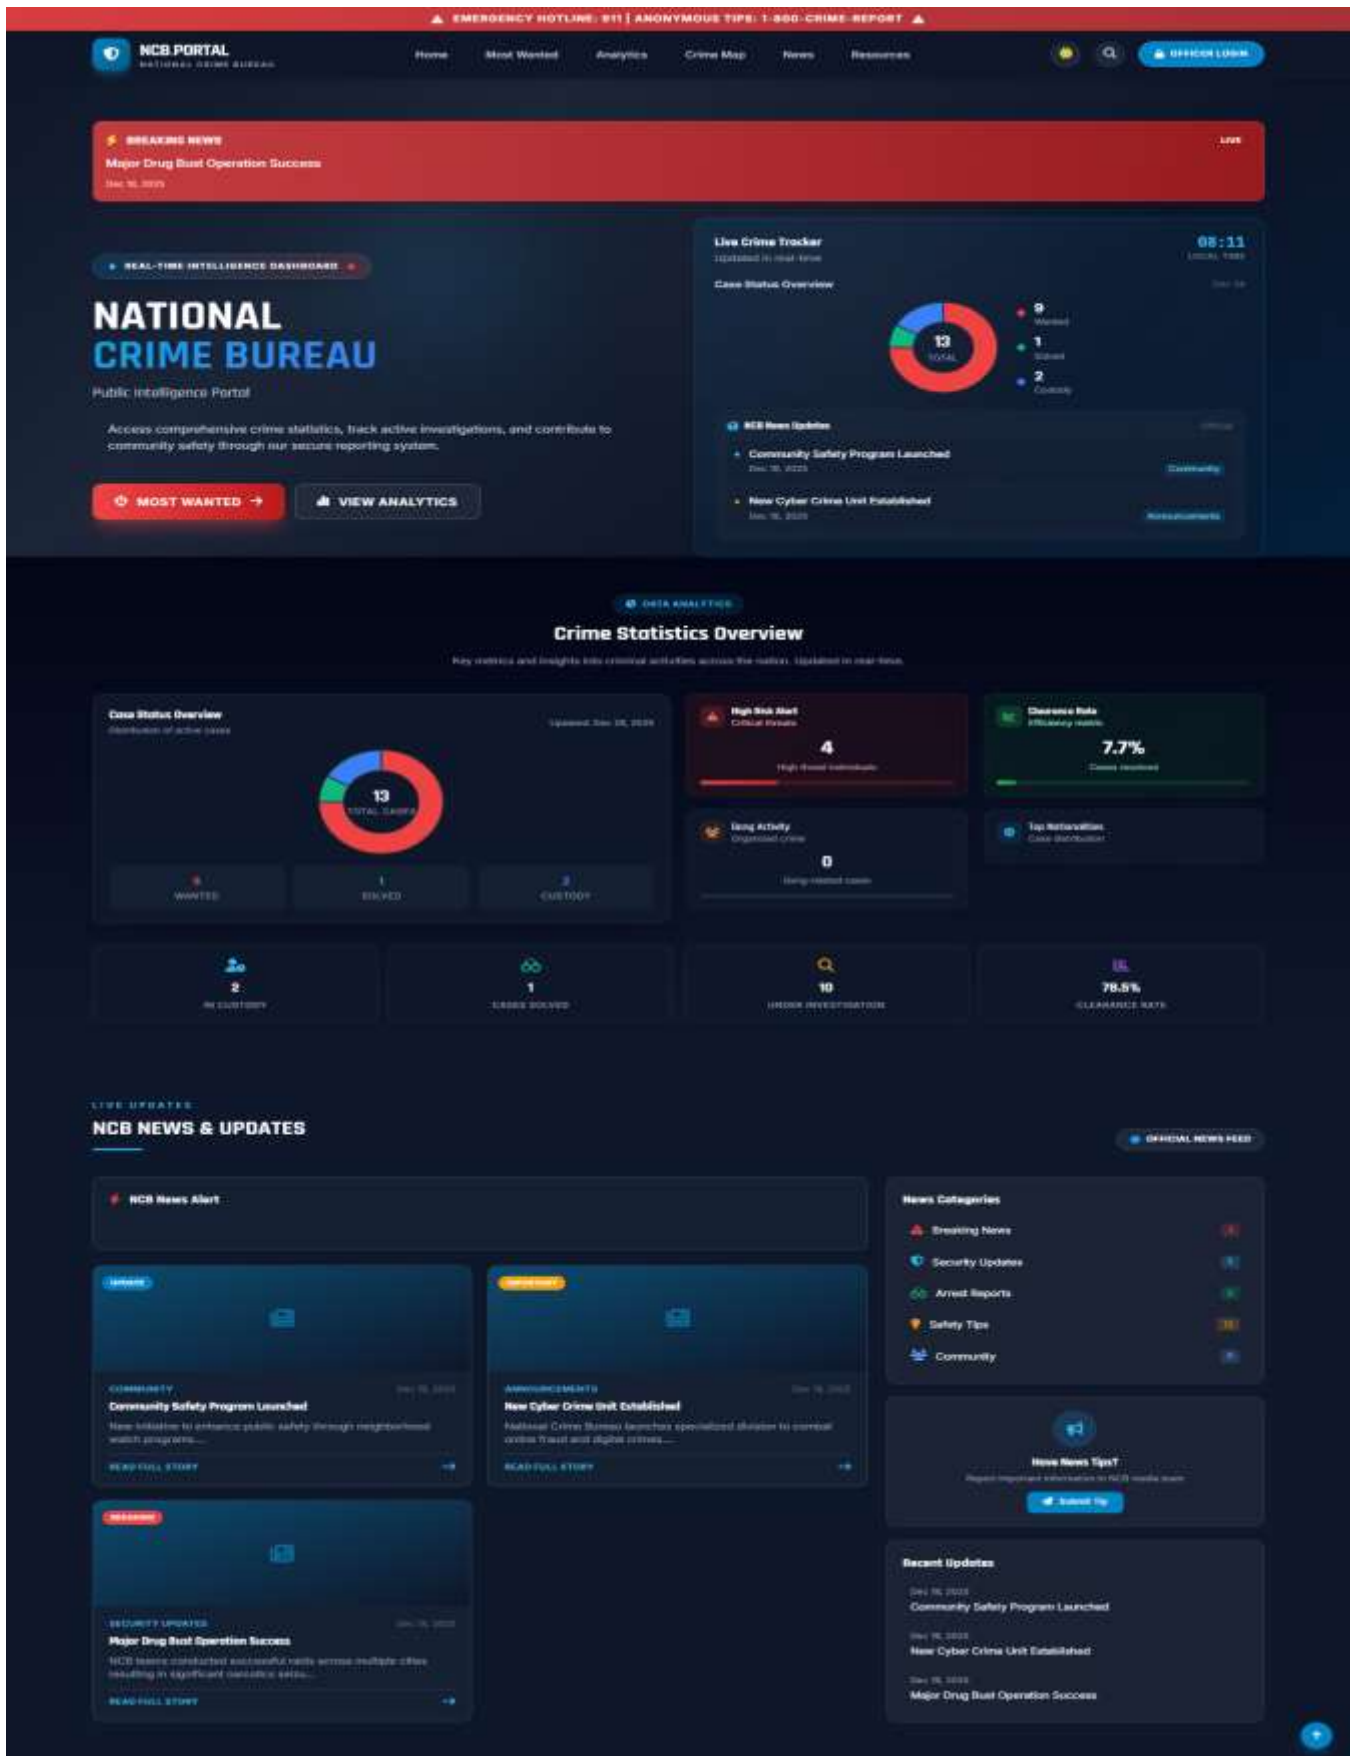

```
crms_db.sql
index.php
login.php
```

2.2 Secure Back-End (`login.php`)

- **Purpose**: Operational management and data entry.
- **Key Components**:
 - **Authentication Gate**: Requires Username, Password, and a Math Captcha.
 - **Dashboard**: Provides officers with immediate operational awareness (e.g., "Active Warrants", "Weather Widget").

- **News Desk:** A dedicated CMS for Newscasters to write and publish articles.

Main Interface

3. User Roles & Capabilities

The system now supports three distinct internal roles defined in the `users` database table.

3.1 Administrator ("Chief Commander")

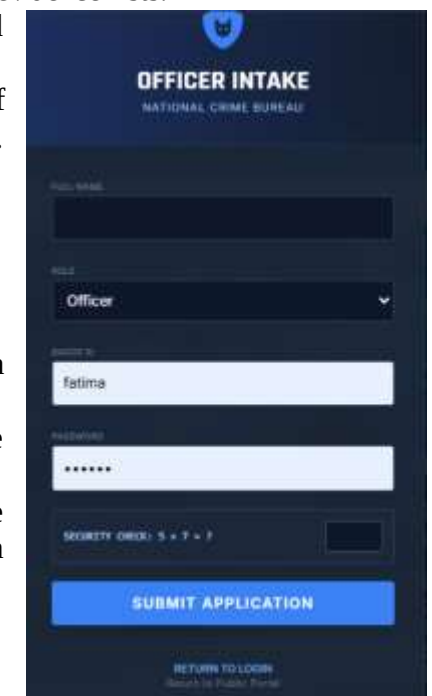

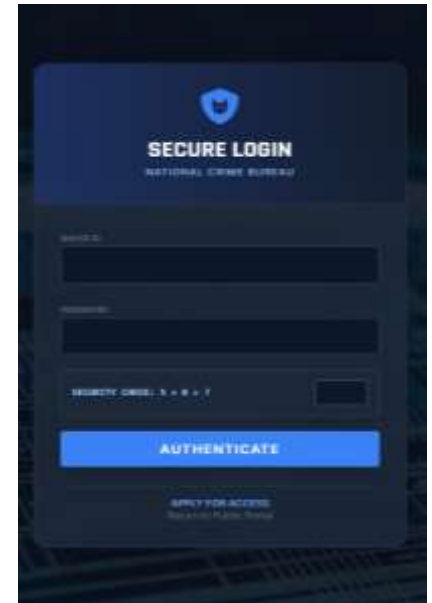

- **Access Level:** Supreme.
- **Exclusive Rights:**
 - **Staff Management:** Can approve pending accounts, suspend officers, and view active personnel units.
 - **Full Oversight:** Access to all records, news, and audit logs.
- **Dashboard:** Sees the "Pending Approvals" counter to manage recruitment.

3.2 Police Officer

- **Access Level:** Operational.
- **Capabilities:**
 - **Add/Edit Records:** Can create detailed criminal profiles including physical attributes (scars, tattoos), biometric references (fingerprint ID), and evidence lists.
 - **Search Database:** Can query the `criminals` table to find suspects by name or alias.
 - **Restrictions:** Cannot access the "News Desk" or "Staff Management".

3.3 Newscaster (Media/Press)

- **Access Level:** Information Only.
- **Capabilities:**
 - **News Desk:** Access to a specialized form to publish Headlines, Alerts, or Public Notices.
 - **Media Upload:** Can upload news-related images to the public feed.
- **Security Restriction:** **Strictly blocked** from viewing the Criminal Database. Attempts to access records result in an "ACCESS RESTRICTED" security warning.

4. Database Design & Schema

The database (`crms_db1`) has been expanded to support complex operations.

Database Overview

The database `crms_db1` is created using MySQL and consists of **six main tables**, each serving a specific purpose in the system.

Tables Description

Users Table

Purpose: Stores system users such as admins, officers, and newscasters.

Key Features:

- Role-based access (Admin, Officer, Newscaster)
- Account status control (Active, Pending, Suspended)
- Secure password storage (hashed)

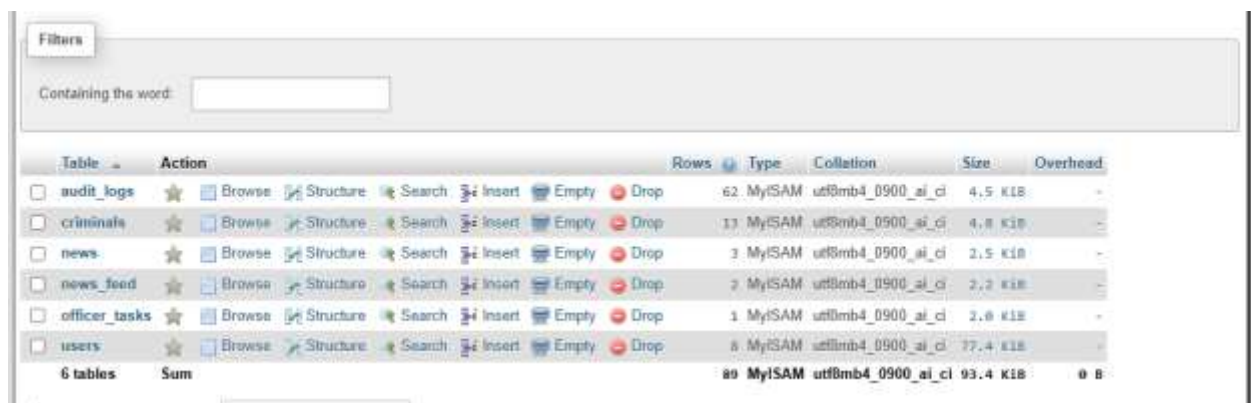

Table	Action	Rows	Type	Collation	Size	Overhead
☐ audit_logs		62	MyISAM	utf8mb4_0900_ai_ci	4.5 KIB	-
☐ criminals		13	MyISAM	utf8mb4_0900_ai_ci	4.8 KIB	-
☐ news		3	MyISAM	utf8mb4_0900_ai_ci	2.5 KIB	-
☐ news_feed		2	MyISAM	utf8mb4_0900_ai_ci	2.2 KIB	-
☐ officer_tasks		1	MyISAM	utf8mb4_0900_ai_ci	2.8 KIB	-
☐ users		8	MyISAM	utf8mb4_0900_ai_ci	77.4 KIB	-
6 tables	Sum	89	MyISAM	utf8mb4_0900_ai_ci	93.4 KIB	0 B

Real-Life Example:

Police officers and administrators logging into the system with different permissions.

Criminals Table

Purpose: Core table storing criminal profiles and case details.

Key Features:

- Personal details (name, age, gender)
- Crime type and risk level
- Case status (Wanted, In Custody, Closed)

- Resolution details for solved cases
- Linked to the officer who added the record

Real-Life Example:

A police department tracking wanted criminals and updating case status after arrest.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	user_id	int			No	None		AUTO_INCREMENT	Change Drop More
2	full_name	varchar(100)	utf8mb4_0900_ai_ci		No	None			Change Drop More
3	username	varchar(50)	utf8mb4_0900_ai_ci		No	None			Change Drop More
4	password	varchar(255)	utf8mb4_0900_ai_ci		No	None			Change Drop More
5	role	enum('admin', 'officer', 'newsreader')	utf8mb4_0900_ai_ci		Yes	officer			Change Drop More
6	status	enum('active', 'pending')	utf8mb4_0900_ai_ci		Yes	pending			Change Drop More
7	created_at	timestamp			Yes	CURRENT_TIMESTAMP		DEFAULT_GENERATED	Change Drop More
8	unit	varchar(50)	utf8mb4_0900_ai_ci		Yes	Patrol			Change Drop More
9	last_login	datetime			Yes	NULL			Change Drop More
10	face_image	longblob	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More

News Feed Table

Purpose: Publishes crime-related news and alerts.

Key Features:

- Public and internal news support
- Media attachments
- Author tracking

Real-Life Example:

Public alerts about wanted criminals or safety notices on a police portal.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int			No	None		AUTO_INCREMENT	Change Drop More
2	title	varchar(255)	utf8mb4_0900_ai_ci		No	None			Change Drop More
3	content	text	utf8mb4_0900_ai_ci		No	None			Change Drop More
4	category	varchar(50)	utf8mb4_0900_ai_ci		Yes	General			Change Drop More
5	image_url	varchar(500)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
6	source	varchar(100)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
7	priority	int			Yes	3	1=Breaking, 2=Important, 3=Regular		Change Drop More
8	status	enum('draft', 'published')	utf8mb4_0900_ai_ci		Yes	published			Change Drop More
9	created_at	timestamp			Yes	CURRENT_TIMESTAMP		DEFAULT_GENERATED	Change Drop More
10	updated_at	timestamp			Yes	CURRENT_TIMESTAMP		DEFAULT_GENERATED ON UPDATE CURRENT_TIMESTAMP	Change Drop More

Complaints Table

Purpose: Allows citizens to submit crime complaints.

Key Features:

- Complaint tracking status
- Officer assignment

- Citizen contact information

Real-Life Example:

A citizen reporting suspicious activity online.

Messages Table

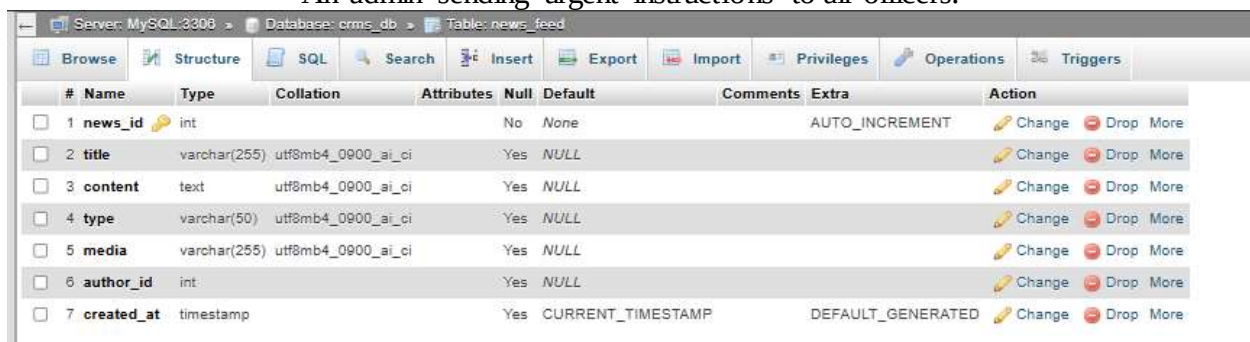

Purpose: Secure internal communication among staff.

Key Features:

- Role-based message delivery
- Priority levels (Normal, Urgent)

Real-Life Example:

An admin sending urgent instructions to all officers.

The screenshot shows the MySQL Table Structure for the 'news_feed' table in the 'cms_db' database. The table has 7 columns: news_id (int, AUTO_INCREMENT), title (varchar(255)), content (text), type (varchar(50)), media (varchar(255)), author_id (int), and created_at (timestamp, CURRENT_TIMESTAMP, DEFAULT_GENERATED). Each column has a 'Change', 'Drop', and 'More' action link.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	news_id	int			No	None		AUTO_INCREMENT	Change Drop More
2	title	varchar(255)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
3	content	text	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
4	type	varchar(50)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
5	media	varchar(255)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
6	author_id	int			Yes	NULL			Change Drop More
7	created_at	timestamp			Yes	CURRENT_TIMESTAMP		DEFAULT_GENERATED	Change Drop More

Audit Logs Table

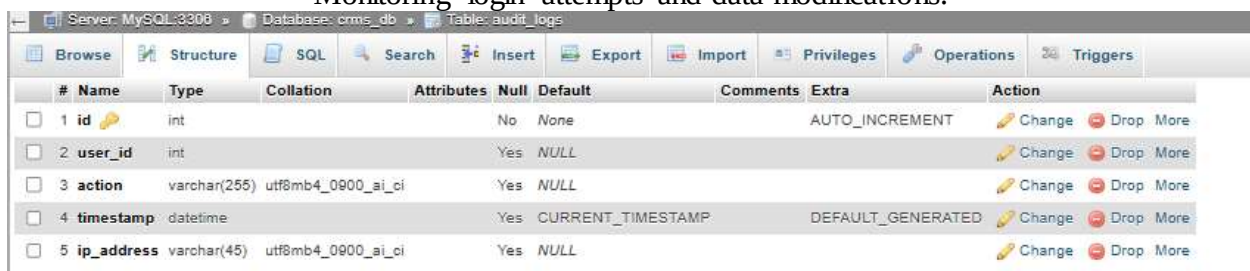

Purpose: Tracks user activities for security and accountability.

Key Features:

- Action logging
- IP address tracking
- Timestamped records

Real-Life Example:

Monitoring login attempts and data modifications.

The screenshot shows the MySQL Table Structure for the 'audit_logs' table in the 'cms_db' database. The table has 5 columns: id (int, AUTO_INCREMENT), user_id (int), action (varchar(255)), timestamp (datetime, CURRENT_TIMESTAMP, DEFAULT_GENERATED), and ip_address (varchar(45)). Each column has a 'Change', 'Drop', and 'More' action link.

#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
1	id	int			No	None		AUTO_INCREMENT	Change Drop More
2	user_id	int			Yes	NULL			Change Drop More
3	action	varchar(255)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More
4	timestamp	datetime			Yes	CURRENT_TIMESTAMP		DEFAULT_GENERATED	Change Drop More
5	ip_address	varchar(45)	utf8mb4_0900_ai_ci		Yes	NULL			Change Drop More

5. Security Features

- Password hashing using bcrypt
- Role-based access control
- Audit logging for every critical action
- Foreign key constraints for data integrity

6. Database Code:

The database includes:

- Default admin account
- Sample officers
- Sample criminal records for testing

This allows **immediate testing and demonstration** of system functionality

```
-- Create the Database
CREATE DATABASE IF NOT EXISTS crms_db1;
USE crms_db1;

-- 1. Users Table (Stores Admins, Officers, Newscasters)
CREATE TABLE IF NOT EXISTS users (
    user_id INT PRIMARY KEY AUTO_INCREMENT,
    full_name VARCHAR(100) NOT NULL,
    username VARCHAR(50) NOT NULL UNIQUE,
    password VARCHAR(255) NOT NULL,
    role ENUM('admin', 'officer', 'newscaster') DEFAULT 'officer',
    unit VARCHAR(50) DEFAULT 'General',
    status ENUM('active', 'pending', 'suspended') DEFAULT 'pending',
    last_login DATETIME,
    face_image LONGTEXT, -- For Biometric Features
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);
```

```
CREATE TABLE IF NOT EXISTS criminals (
    criminal_id INT PRIMARY KEY AUTO_INCREMENT,
    full_name VARCHAR(100) NOT NULL,
    alias VARCHAR(100),
    age INT,
    gender VARCHAR(20) DEFAULT 'Male',
    height VARCHAR(20),
    weight VARCHAR(20),
    eye_color VARCHAR(20),
    hair_color VARCHAR(20),
    scars_marks TEXT,
    nationality VARCHAR(50),
    crime_type VARCHAR(100) NOT NULL,
    status VARCHAR(50) DEFAULT 'Wanted', -- Wanted, In Custody, Solved/Closed
    risk_level VARCHAR(20) DEFAULT 'Low',
    gang_affiliation VARCHAR(100),
    fingerprint_id VARCHAR(50),
    bail_status VARCHAR(50) DEFAULT 'Not Set',
    evidence_list TEXT,
    description TEXT,
    resolution_notes TEXT, -- New: For "Case Solved" details
    resolution_date DATETIME, -- New: When was it solved?
    mugshot VARCHAR(255) DEFAULT 'default.png',
    added_by INT,
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,
    FOREIGN KEY (added_by) REFERENCES users(user_id) ON DELETE SET NULL
);
```

```
-- 3. News Feed Table (For Public Portal)
CREATE TABLE IF NOT EXISTS news_feed (
    news_id INT AUTO_INCREMENT PRIMARY KEY,
    title VARCHAR(255),
    content TEXT,
    type VARCHAR(50), -- News, Alert, Notice
    media VARCHAR(255),
    author_id INT,
    is_public TINYINT(1) DEFAULT 1,
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

-- 4. Complaints Table (Citizen Reporting)
CREATE TABLE IF NOT EXISTS complaints (
    comp_id INT AUTO_INCREMENT PRIMARY KEY,
    citizen_name VARCHAR(100),
    contact_info VARCHAR(100),
    subject VARCHAR(255),
    details TEXT,
    status ENUM('Received', 'Investigating', 'Closed') DEFAULT 'Received',
    assigned_officer INT NULL,
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);
```

```
-- 5. Internal Messages (Secure Comm)
CREATE TABLE IF NOT EXISTS messages (
    msg_id INT AUTO_INCREMENT PRIMARY KEY,
    sender_id INT,
    recipient_role ENUM('all', 'admin', 'officer', 'newscaster'),
    message TEXT,
    priority ENUM('Normal', 'Urgent') DEFAULT 'Normal',
    created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

-- 6. Audit Logs (Security Tracking)
CREATE TABLE IF NOT EXISTS audit_logs (
    log_id INT AUTO_INCREMENT PRIMARY KEY,
    user_id INT,
    action VARCHAR(255),
    ip_address VARCHAR(45),
    timestamp DATETIME DEFAULT CURRENT_TIMESTAMP
);

-- Default Admin Account (Pass: admin123)
INSERT INTO users (full_name, username, password, role, status, unit)
VALUES ('Chief Commander', 'admin', '$2y$10$SfhYIDtn.iSyCo8Rlc31..KclK9RHH.pwI91.w4q.qXp.j/0.m.C6', 'admin'

-- Sample Data (Officers)
INSERT INTO users (full_name, username, password, role, status, unit) VALUES
('Officer John Smith', 'john', '$2y$10$SfhYIDtn.iSyCo8Rlc31..KclK9RHH.pwI91.w4q.qXp.j/0.m.C6', 'officer', ' ',
('Det. Sarah Connor', 'sarah', '$2y$10$SfhYIDtn.iSyCo8Rlc31..KclK9RHH.pwI91.w4q.qXp.j/0.m.C6', 'officer', ' ');

-- Sample Data (Criminals)
INSERT INTO criminals (full_name, alias, age, gender, crime_type, status, risk_level, description, added_by)
VALUES ('The Night Stalker', 'Shadow', 34, 'Male', 'Theft', 'Wanted', 'High', 'Breaking into jewelry stores at midn',
('Victor Vance', 'Viper', 29, 'Male', 'Drug Trafficking', 'In Custody', 'Extreme', 'Apprehended at docks.',
('Maria Cruz', 'Widow', 41, 'Female', 'Homicide', 'Wanted', 'Extreme', 'Wanted for poisoning associates.',
```

Insertion:

```
-- Default Admin Account (Pass: admin123)
INSERT INTO users (full_name, username, password, role, status, unit)
VALUES ('Chief Commander', 'admin', '$2y$10$SfhYIDtn.iSyCo8Rlc31..KclK9RHH.pwI91.w4q.qXp.j/0.m.C6', 'admin'

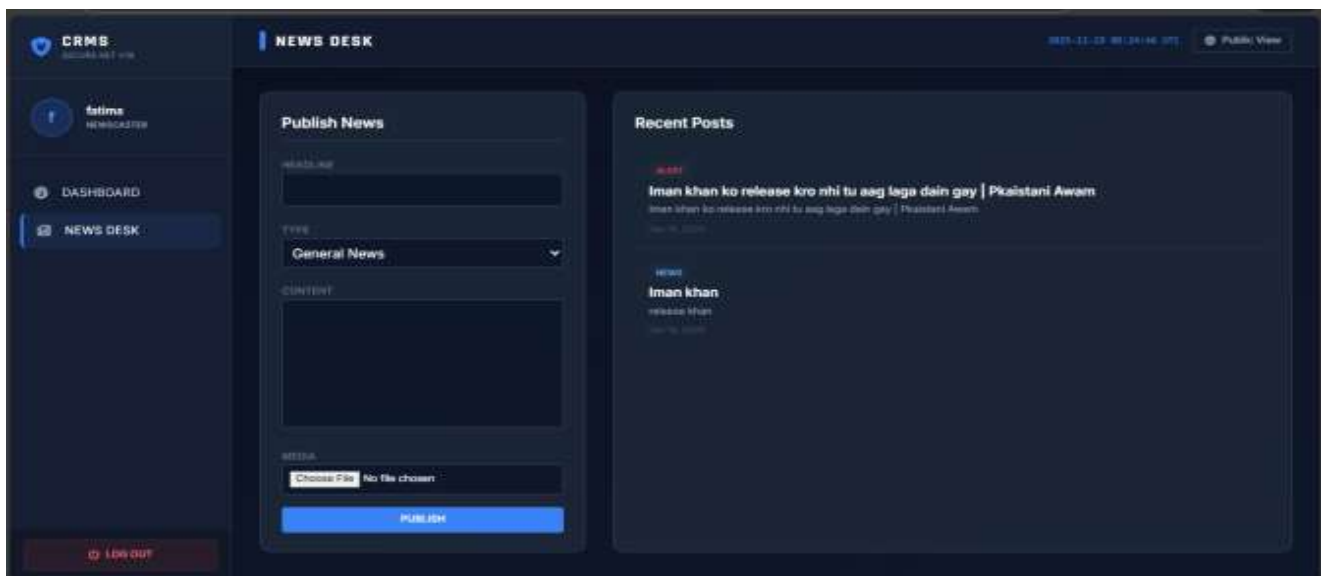

-- Sample Data (Officers)
INSERT INTO users (full_name, username, password, role, status, unit) VALUES
('Officer John Smith', 'john', '$2y$10$SfhYIDtn.iSyCo8Rlc31..KclK9RHH.pwI91.w4q.qXp.j/0.m.C6', 'officer', ' ',
('Det. Sarah Connor', 'sarah', '$2y$10$SfhYIDtn.iSyCo8Rlc31..KclK9RHH.pwI91.w4q.qXp.j/0.m.C6', 'officer', ' ');

-- Sample Data (Criminals)
INSERT INTO criminals (full_name, alias, age, gender, crime_type, status, risk_level, description, added_by)
VALUES ('The Night Stalker', 'Shadow', 34, 'Male', 'Theft', 'Wanted', 'High', 'Breaking into jewelry stores at midn',
('Victor Vance', 'Viper', 29, 'Male', 'Drug Trafficking', 'In Custody', 'Extreme', 'Apprehended at docks.',
('Maria Cruz', 'Widow', 41, 'Female', 'Homicide', 'Wanted', 'Extreme', 'Wanted for poisoning associates.',
```

7. Key Functional Modules

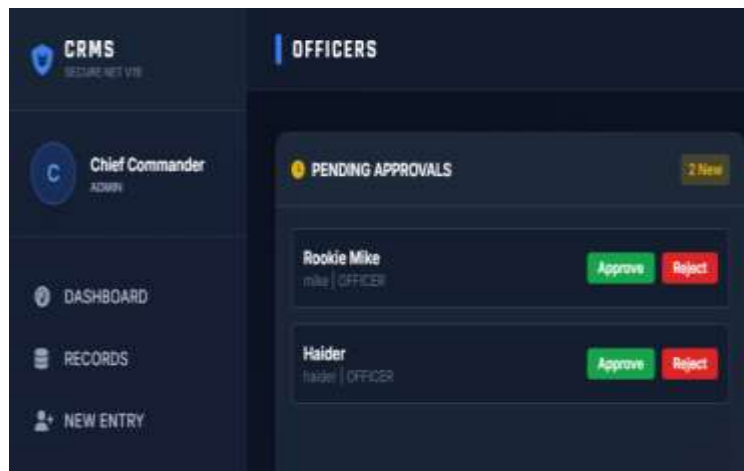

7.1 The "News Desk" Module

- **Logic:** A Content Management System (CMS) embedded within the secure portal.
- **Workflow:**
 1. Newscaster logs in.
 2. Navigates to `?page=news_desk`.
 3. Selects type (e.g., "Emergency Alert").
 4. Submits content.
 5. The system saves it to `news_feed`, and `index.php` immediately renders it on the Public Portal under the "Breaking News" ticker.

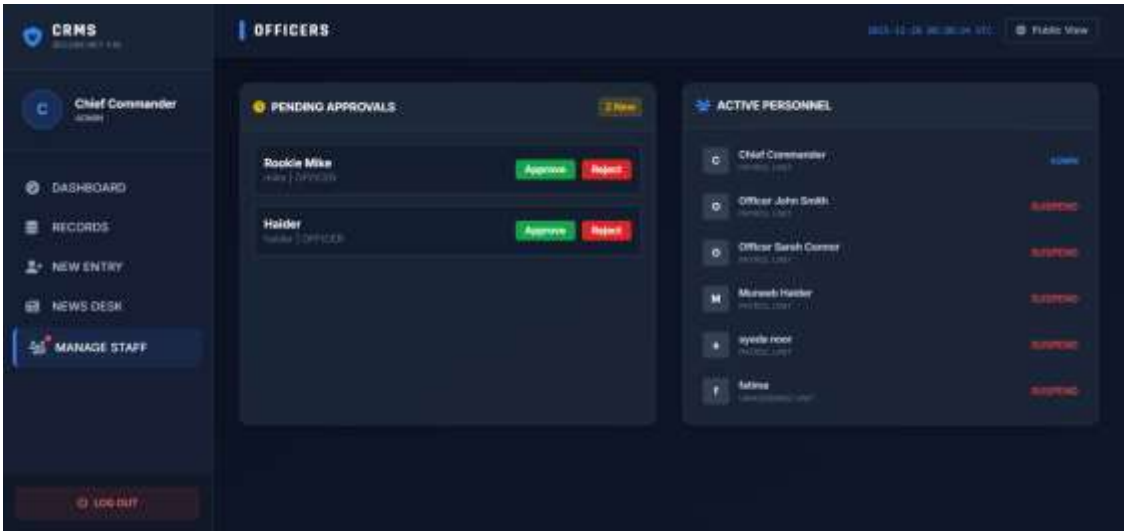

7.2 The "Pending Approval" Workflow

- **Logic:** Security by default.
- **Process:**
 1. User registers via `login.php?page=register`.
 2. Database inserts row with `status = 'pending'`.
 3. User sees "Application Sent" message.
 4. Admin logs in, sees "Yellow Card" notification for pending users.
 5. Admin clicks "Approve", updating `status` to `active`.

The Staff Approval System:

8. Security Architecture

The system implements defense-in-depth strategies.

8.1 Anti-Bot Verification (Math Captcha)

Mechanism: The login session generates two random numbers (`$_SESSION['c_n1']`, `$_SESSION['c_n2']`).

- **Validation:** The user must calculate the sum. If `(int)$_POST['captcha']` does not match the session sum, the login is rejected with "Security Check Failed".

A login form with a dark background. It has a 'BADGE ID' field containing 'fatima', a 'PASSWORD' field with masked characters, and a 'SECURITY CHECK: 5 + 7 = ?' field with an input box. A large blue 'SUBMIT APPLICATION' button is at the bottom.

8.2 Session Hijacking Protection & IP Logging

- **Mechanism:** `session_regenerate_id(true)` is called upon successful login to prevent session fixation attacks.
- **Audit Trail:** Every critical action (Login, Logout, Publish News) triggers the `logAction()` function, which records the user ID, Action, and IP Address into the `audit_logs` table.

	id	user_id	action	timestamp	ip_address
☐ Edit ☐ Copy ☐ Delete	1	1	User Logged In	2025-12-16 23:08:02	NULL
☐ Edit ☐ Copy ☐ Delete	2	1	Added Criminal: alia	2025-12-16 23:10:00	NULL
☐ Edit ☐ Copy ☐ Delete	3	1	User Logged Out	2025-12-16 23:11:15	NULL
☐ Edit ☐ Copy ☐ Delete	4	1	Biometric Login Verified	2025-12-16 23:11:51	NULL
☐ Edit ☐ Copy ☐ Delete	5	1	User Logged Out	2025-12-16 23:11:59	NULL
☐ Edit ☐ Copy ☐ Delete	6	1	Biometric Login Verified	2025-12-16 23:13:15	NULL
☐ Edit ☐ Copy ☐ Delete	7	1	User Logged Out	2025-12-16 23:13:34	NULL
☐ Edit ☐ Copy ☐ Delete	8	1	Biometric Login Verified	2025-12-16 23:13:33	NULL

8.3 Input Sanitization

- **Defense:** All inputs are processed through a custom `sanitize()` function which applies `htmlspecialchars()` and `$conn->real_escape_string()`. This neutralizes Cross-Site Scripting (XSS) and SQL Injection attacks.

9. Technical Stack

- **Frontend Framework:** Tailwind CSS (configured with `darkMode: 'class'` for night-ops aesthetic).
- **Visualization:** Chart.js (Donut charts for case status), Leaflet.js (Map interface).
- **Backend:** PHP 8.0+ (Vanilla, Session-based).
- **Database:** MySQL / MariaDB (Relational).
- **Assets:** FontAwesome v6.4 (Icons), Unsplash API (Backgrounds), DiceBear API (Dynamic Avatars).

10. Conclusion

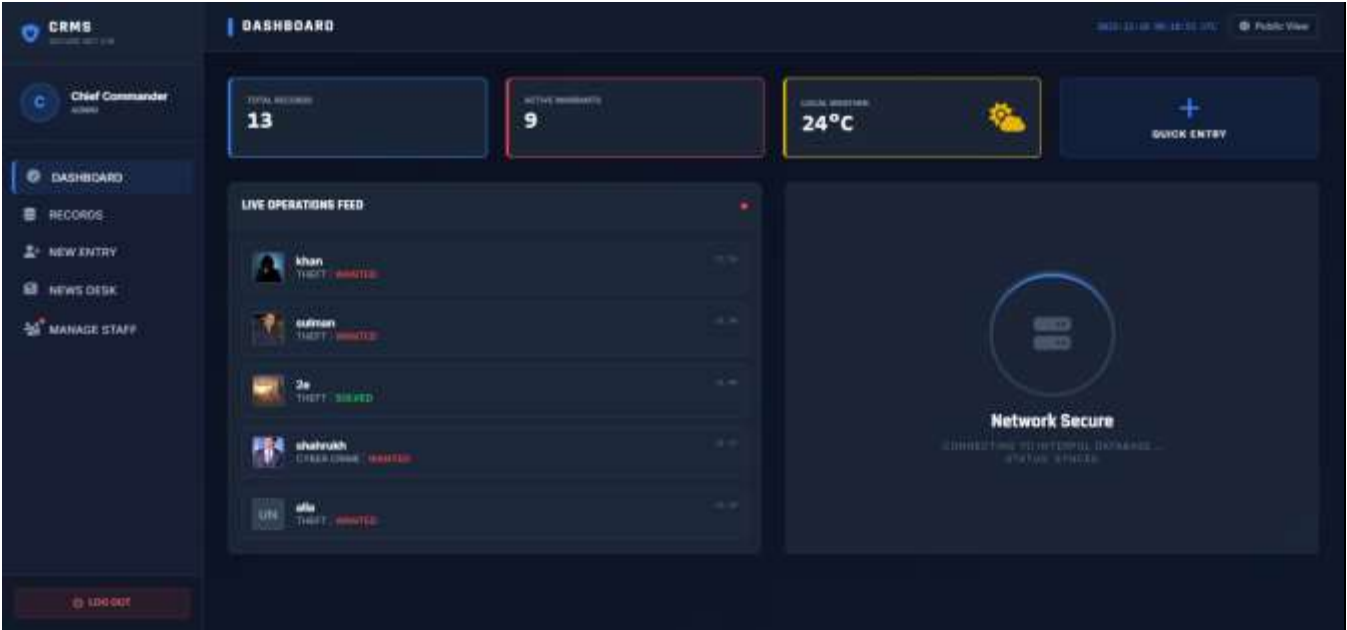

The CRMS database is **well-structured, secure, and scalable**. It supports real-world law enforcement operations such as criminal tracking, public reporting, internal communication, and security monitoring.

11. References

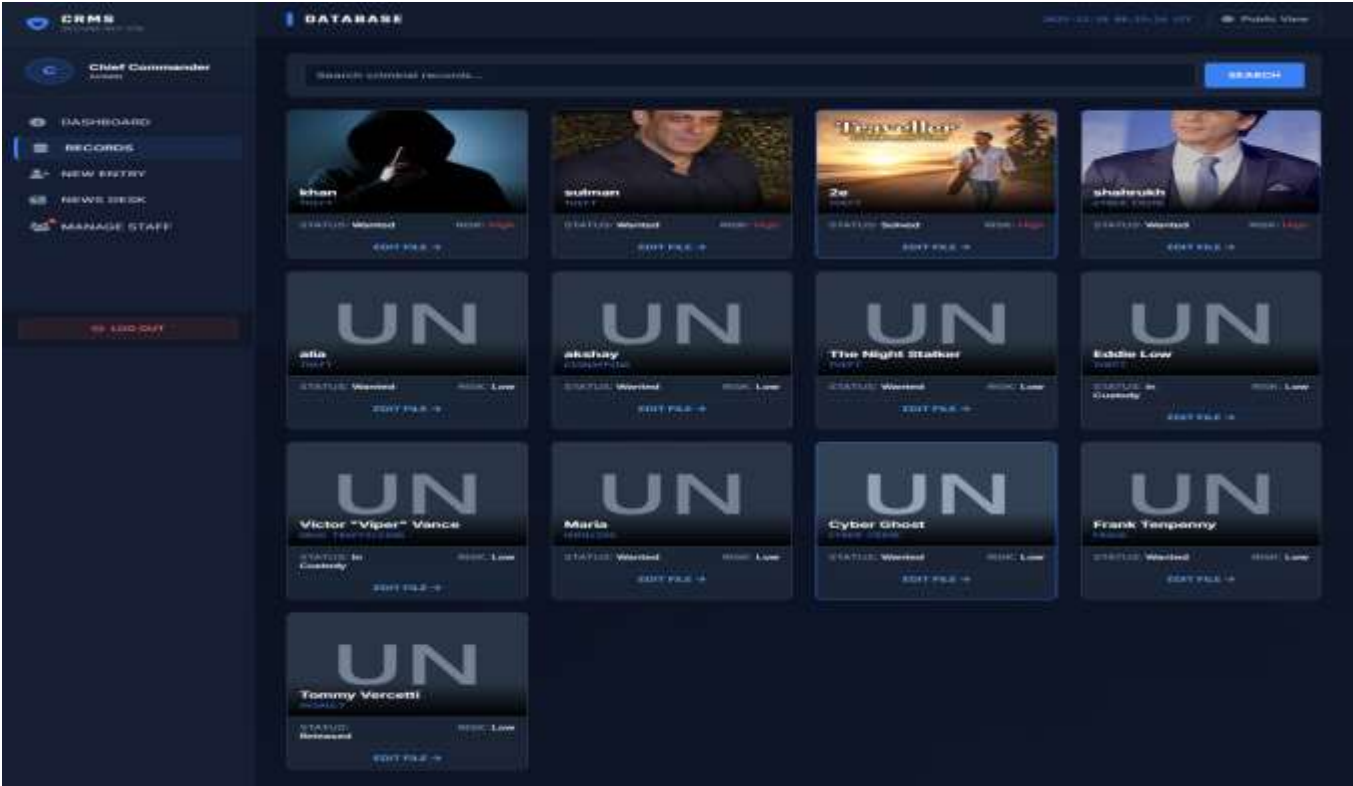

1. **System Files:** `index.php` (Public Portal), `login.php` (Secure Portal), `crms_db.sql` (Database Schema).
2. **Libraries:**
 - **Tailwind CSS:** <https://tailwindcss.com/>
 - **Chart.js:** <https://www.chartjs.org/>
 - **Leaflet Maps:** <https://leafletjs.com/>
 - **DiceBear Avatars:** <https://dicebear.com/>
3. **Security Standards:** OWASP Session Management Guidelines
